I am a forward thinker, seeking to build my own systems as a software engineer. I have a good eye for detail when debugging my code whilst being able to identify errors and finding solutions. Networking with people from a diversity of fields comes naturally to me, including creative and medical professionals.

EDUCATION

BSc	Queen Mary University of London Computer Science with Industrial Experience	2022-2026
	The Latymer School, London, Edmonton A-levels in Chemistry, Biology & Math	2012-2019

EMPLOYMENT

BYG Systems
Work remotely testing and ensuring software for e-learning services is ready for   2022-current
Blue chip companies.

The Doctors laboratory, Royal Free Hospital   2021-2022
Worked night shifts, diagnosing and correcting defects with automated medical PCR machines. Worked with technicians optimizing machine instruction code in python. Liaised A&E patient COVID results in secure java-based system

Islington Central Medical Centre,   2022-Current
Worked in SQL within EMIS software to verify patients with cancer referrals are handled in a timely manner. Use EMIS to add codes and label important documents in patients' consultations. Managed front desk, telephone calls and booking appointments for doctors.
